

PRODUCT PERFORMANCE ANALYSIS

How efficiently are we converting sales into profit across time and regions?

TOTAL SALES

\$25M

TOTAL PROFIT

\$10M

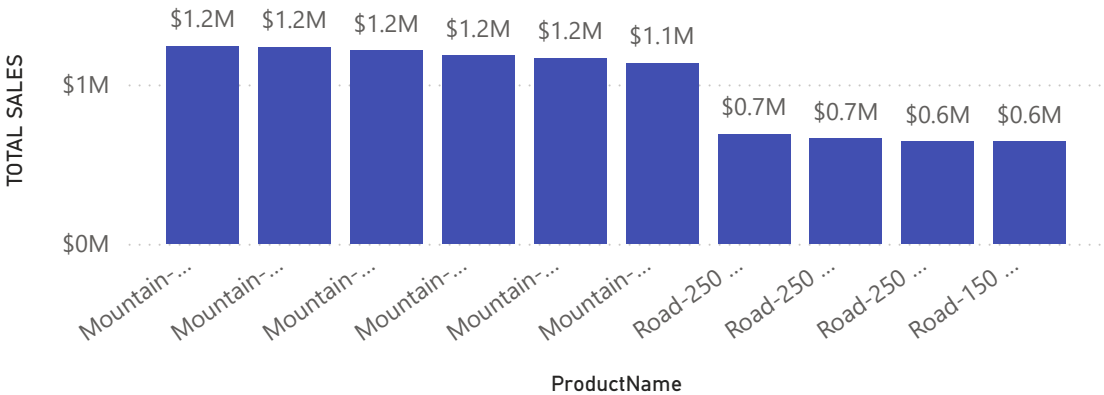

RETURN RATE

2.17%

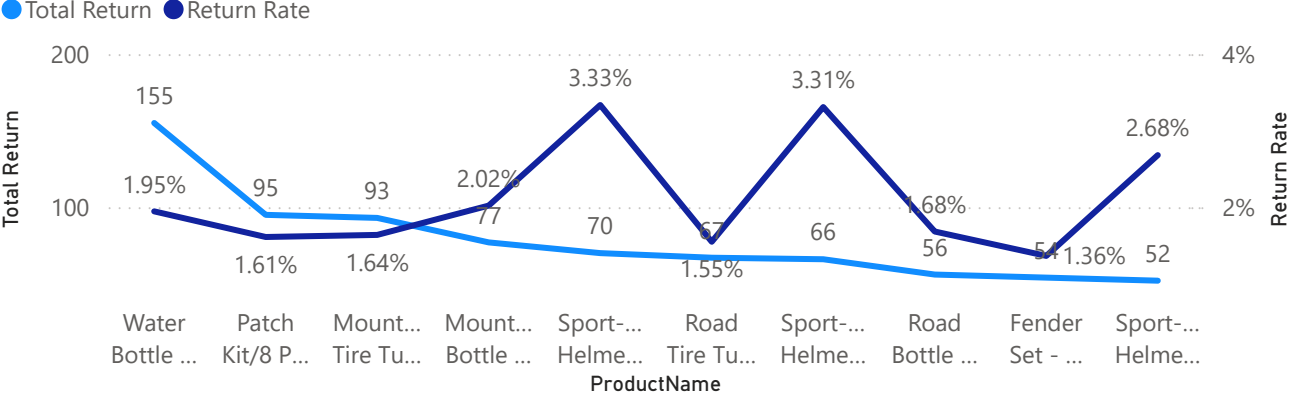

PROFIT MARGIN

41.96%

TOTAL SALES BY PRODUCT

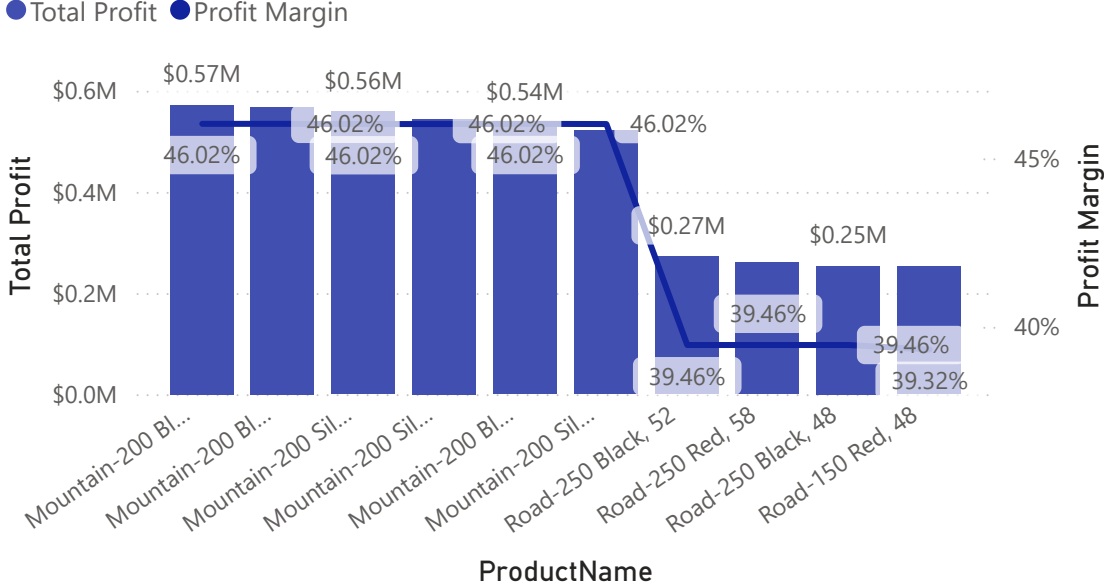

RETURN BY PRODUCT

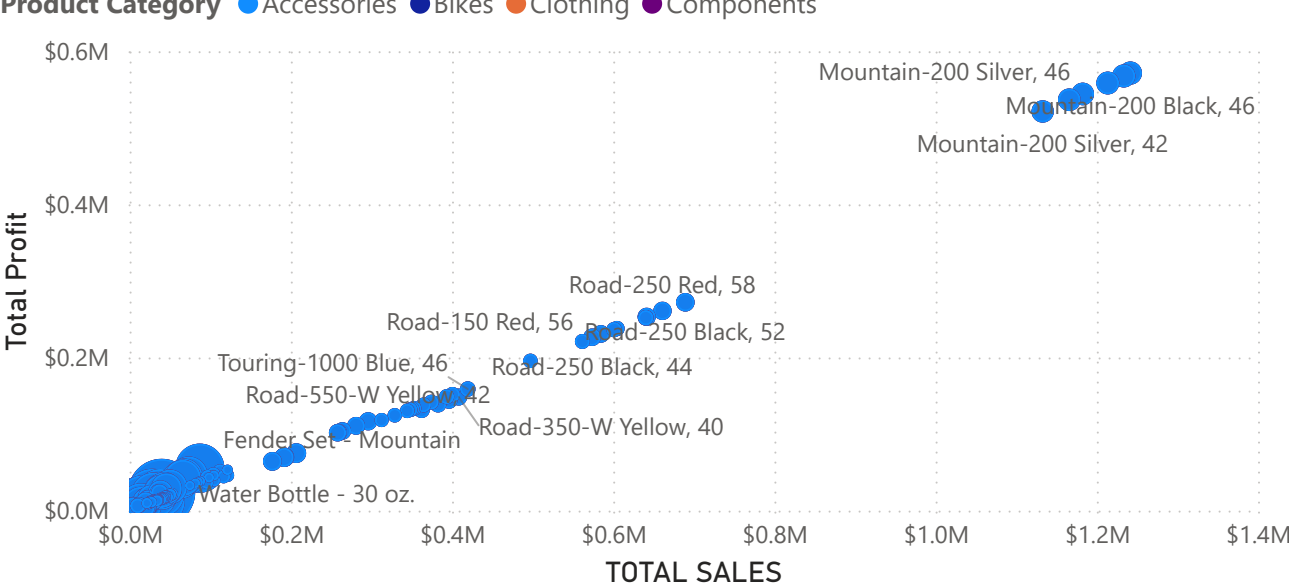

Insights: Sales are driven primarily by a small group of high-performing products, while the majority contribute marginal revenue.

Insights: Certain products exhibit higher return rates independent of sales volume, indicating potential quality or expectation mismatches.

Total Profit and Profit Margin by ProductName

TOTAL SALES, Total Profit and Total order by ProductName and Product Category

Insight :While top products drive the majority of profit, margin erosion is visible in lower-selling products, suggesting pricing or cost inefficiencies

Insights: Sales and profit are strongly correlated, with certain products delivering disproportionately high profit, indicating candidates for focused scaling.
